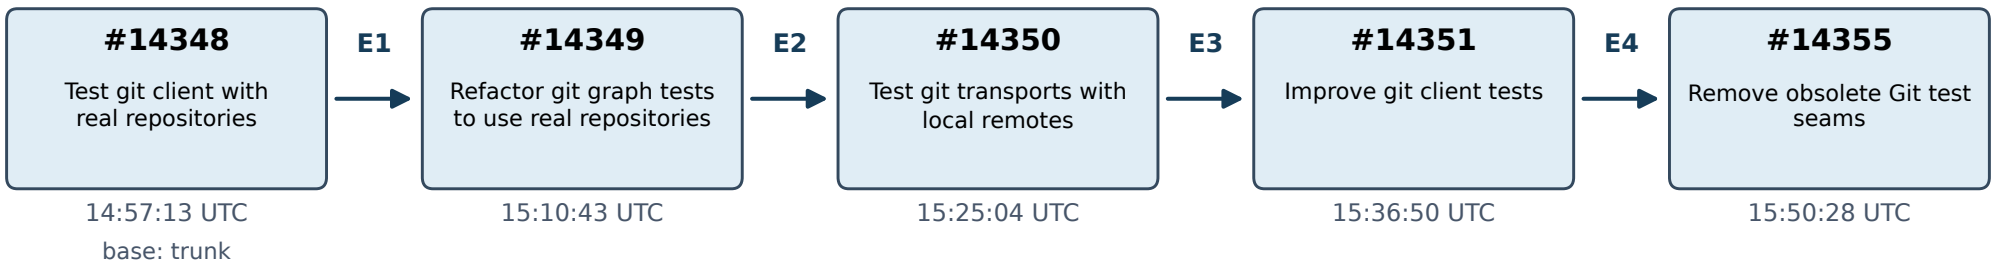
StackGraph: verified branch-targeting relationships

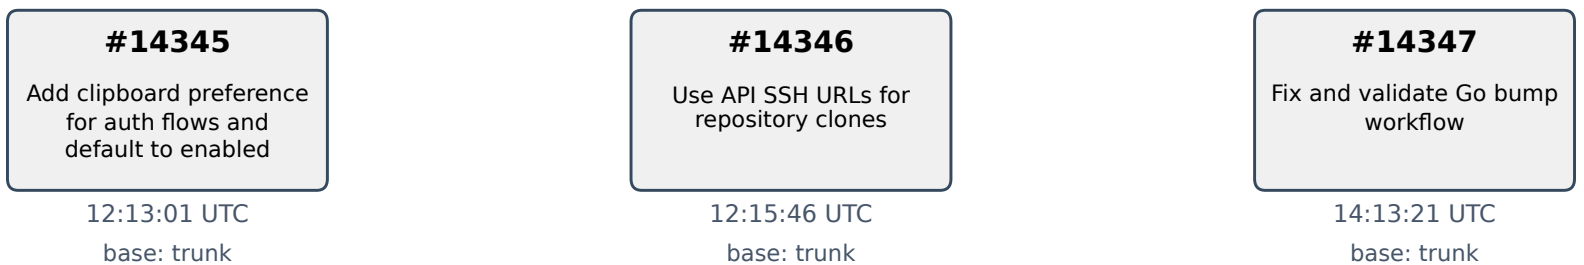
cli/cli • eight PRs by @williammartin • creation date: 4 September 2026

Arrows: prerequisite → dependent. Edge labels map to exact branch evidence below.

a Branch-connected PRs



b Isolated controls within this sample



Verified edges: parent head = child base (repository = cli/cli for every endpoint)

E1 williammartin-git-real-repo-test-harness
E2 williammartin-git-graph-tests
E3 williammartin-git-transport-tests
E4 williammartin-improve-git-tests

Snapshot: 28 October 2026. Node color follows branch connectivity; official stack fields and timing create no edges.
Isolation is sample-relative. Branch structure does not establish semantic dependency, workflow legitimacy, or human authorship.
